

REDMAN[®]

POWER CHAIR

800.727.6684 TUCSON, AZ

MADE TO ORDER

EXPERIENCE THE REDMAN DIFFERENCE

CUSTOM MADE TO ORDER • Every Redman Power Chair is custom-fitted to you and can be adapted to a wide variety of needs. Each chair is built specifically to fit the individual with no mass production. Redman builds your chair intrinsically as one piece, designed to meet your unique specifications.

PATENTED TECHNOLOGY • Our full-body positioning chair provides a variety of positions that no other chair on the market can offer. The Redman Chief 107-ZRx is the only mid-wheel standing chair that elevates, tilts, stands and reclines. It has the most narrow footprint amongst all competitors.

UNPARALLELED MOBILITY • The Redman Power Chair system automatically compensates for body position. Redman users can enjoy unassisted standing, reclining, tilting and stretching. It can be controlled by joystick, foot control, sip and puff, head array, or remote control.

ONLY ONE MODEL • Rather than offering a confusing array of makes and models, Redman builds just one uniquely advanced full body positioning power chair, the Chief 107-ZRx. Our continuous focus on perfecting this one model for over 35 years is the primary reason for our continued success.

SO MANY OPTIONS • The Redman Chief 107-ZRx Power Chair is available with an endless list of options. Make it your very own with custom colors, lights, tires, and so much more!

MADE IN THE USA • A Redman Power Chair is an FDA approved product proudly made in Arizona and sold all across the United States. We are a family owned company with uncompromisable dedication to engineering, quality and safety. We have created a unique machine with infinite possibilities.

IN-HOME DEMOS & DELIVERY • We bring our chair to you to try in your home or office. Our chairs are guaranteed to your individual fit and function. We ensure the final fit and settings are perfect when we personally deliver your final product.

FACTORY DIRECT SERVICE • We provide our expertise and services directly to you, with no middleman – including evaluation and fitting, delivery and setup with a complete fit/function guarantee, plus repair and maintenance through a nationwide network of trained staff.

IN-HOUSE INSURANCE & BILLING • We do it all for you. Redman is one of just a handful of power chair companies with an in-house insurance department. Our insurance experts are experienced and knowledgeable. We also provide payment plans as needed with in-house financing options.

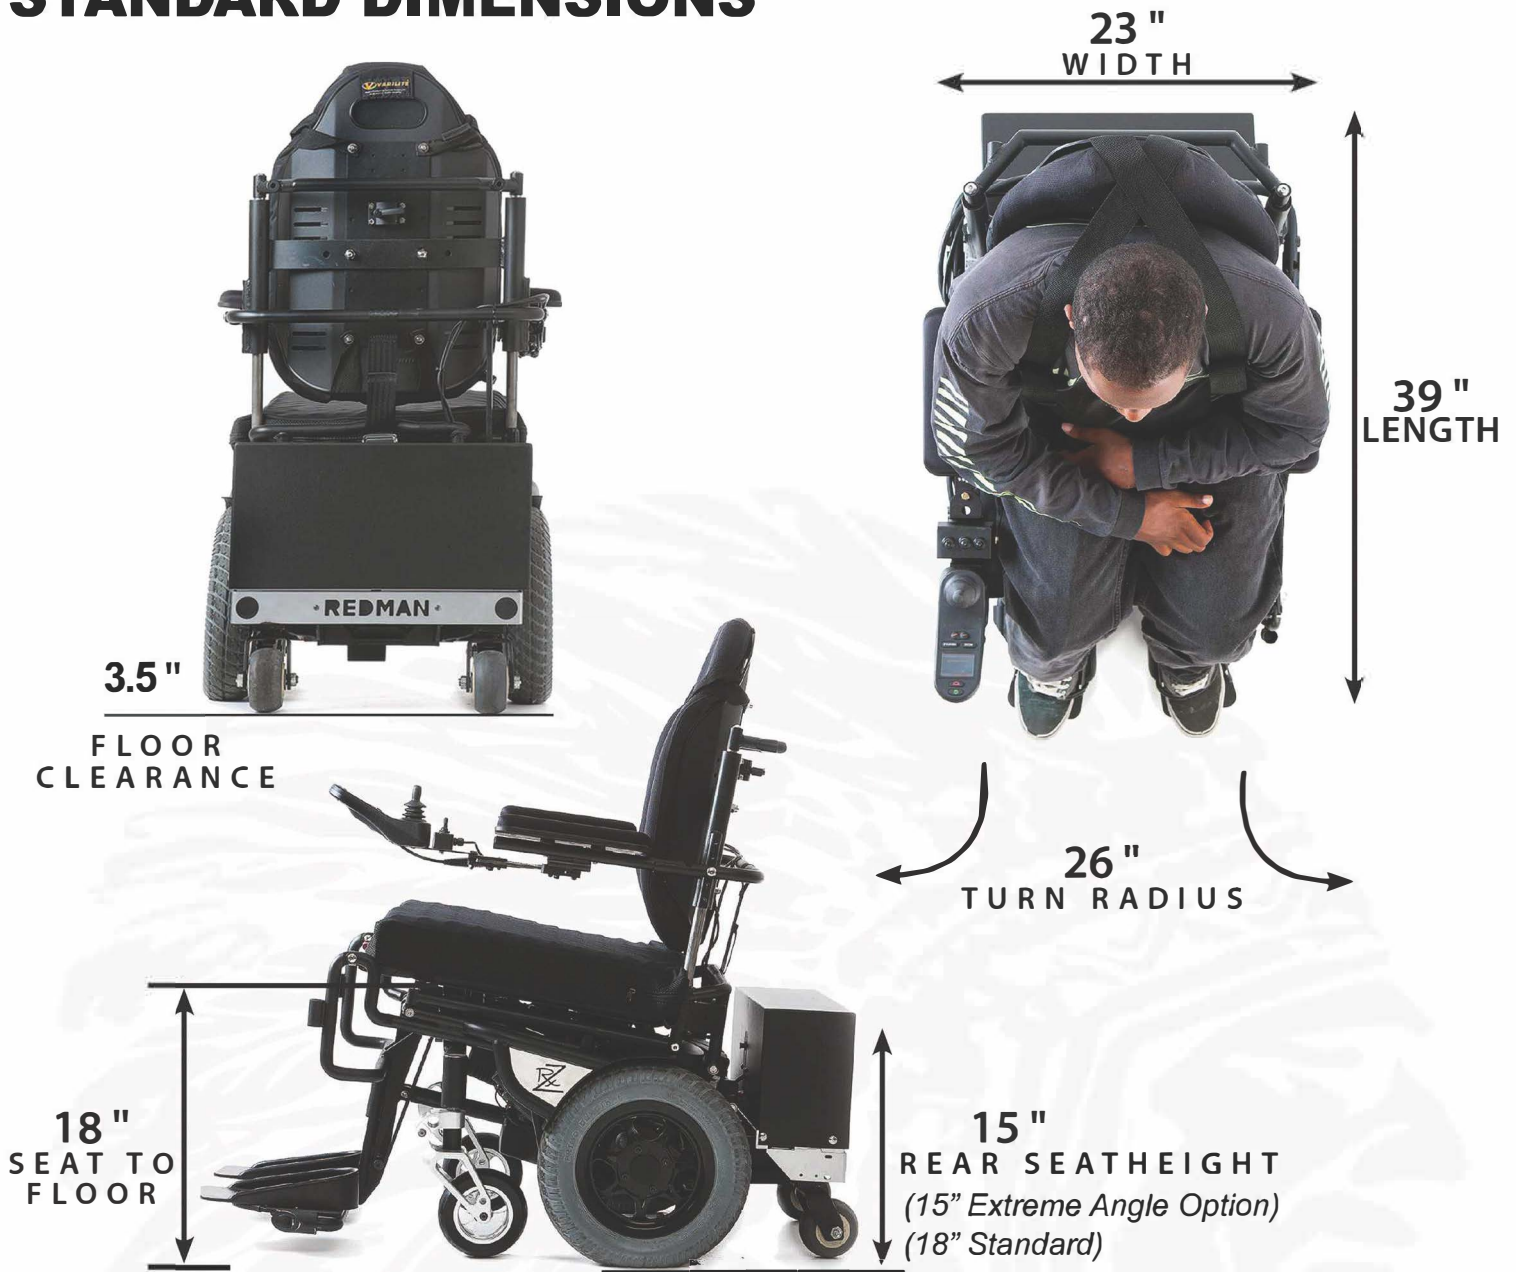

24/7/365 CUSTOMER SUPPORT • We offer live customer support around the clock. Our customer service department is available all day, every day, 365 days a year.

Mid-Section Open

Improved Bowel & Bladder Function

Pressure Relief

Weight Reduced on Seating Region

Cord Extension

Weight Bearing
Heel Cord Stretch

REDMAN®
POWER CHAIR

IT'S IN THE DETAILS

What you do not see also has significance!

The Redman chair does not have any small wheels located around or under the foot plate.

Why does this make a difference?

Those small wheels stick easily on carpets, pebbles, and other smaller items which can result in damage to your home and affect your freedom of movement.

Our system will “float” you with the patented Redman counterbalance system. This unique technology provides superior stability and maneuverability while standing.

Look!

No Small Wheels
We Float You!

Preferred Mid-Wheel Drive

Patented Balance
Gravity System
Telescopes Out in
Standing Positions

The Importance of Drive-Wheel Position

- 1) Having the drive wheels in mid-position makes turning natural and intuitive.
The smaller the arc, the less centripetal force endured
– which is important for trunk stability and maneuverability.
- 2) Traction and control are improved with mid-wheel driven chairs.
Unlike cars, power chairs have more traction when the wheels are toward the rear
– where the majority of the weight is.
- 3) Drive wheels do not have to work as hard as spin casters – especially on soft surfaces.
- 4) Stability and traction are superior when going up and down ramps.
- 5) Traversing slopes is easier with increased momentum.
- 6) Speed and directional stability are improved.

Experience the Redman Difference!

I am paralyzed from the chest down with a C7-T1 break. This is the 3rd Redman powerchair that I have lived in... I have done my research looking for a stand-up chair that fits comfortably under a table and the Redman powerchair is the only one I have found that benefits me in this way. I also want to emphasize how important having a leg restraint to hold my legs and feet in place. The leg restraint allows me to sit with better posture and keeps my feet in place on the footrests...

Wherever I travel I receive many compliments, especially when standing. Many people confined in wheelchairs, and the loved ones of those individuals, have no idea that there is a wheelchair out there that allows one to stand. Not only does standing help my body physically, but emotionally as well. When I stand and reach for something at home or while shopping, I am more independent. Also, not always having to look up at people when talking helps my self-confidence. Thank you, Redman!

~ Michele & Mike N.
